Begin Using MirrorUI

Begin using your mirror for the first time by touching the power button located at the bottom-center of the mirror.

Setting Up

After powering on your mirror for the first time, you are asked to setup the default language of choice for your mirror.

You will now be prompted to connect to Wi-Fi network. If you choose to connect, then the rest of the setup process is complete. If you skip connection, look at the following step located on this page.

If you chose to **not** connect to a network, then you must manually set the time, date, and location. Each of which are set through an onscreen number-pad or keyboard.

Creating a User

To create a new user, press 'Create New User'

Now enter the user name for this account.

If you would like to lock this account with a pin, enter it and hit enter. If you would like a pin-free account, then just press enter.

Idle Mode

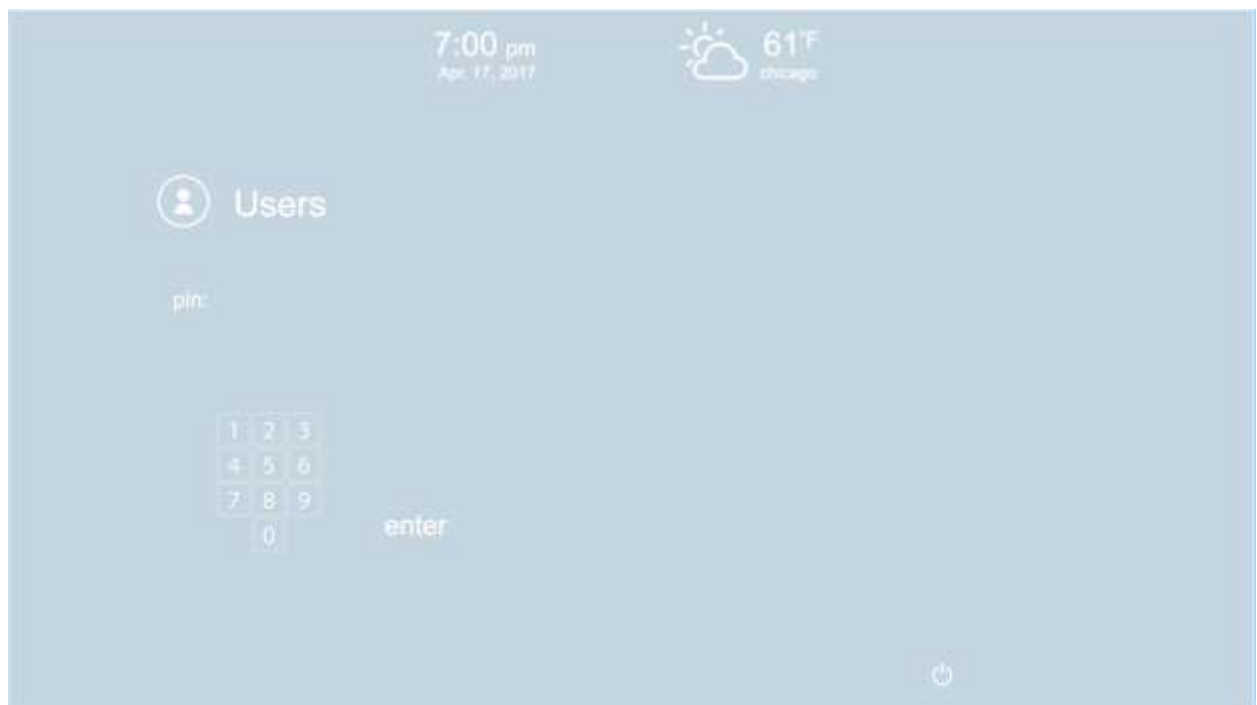

To begin using your mirror, decide which side you would like to be on and press the power button to that corresponding side.

Logging In

Select the user account you would like to login to

Input the user's password, and then press 'enter'

Opening Apps

Once logged in, the bottom button is now a app-menu button.

After pressing the app-menu button, the apps are expanded upward for your choosing.

Once you pressed the app you'd like to use, select the placement of the app.

Now you may begin interfacing with the app.

Closing Apps

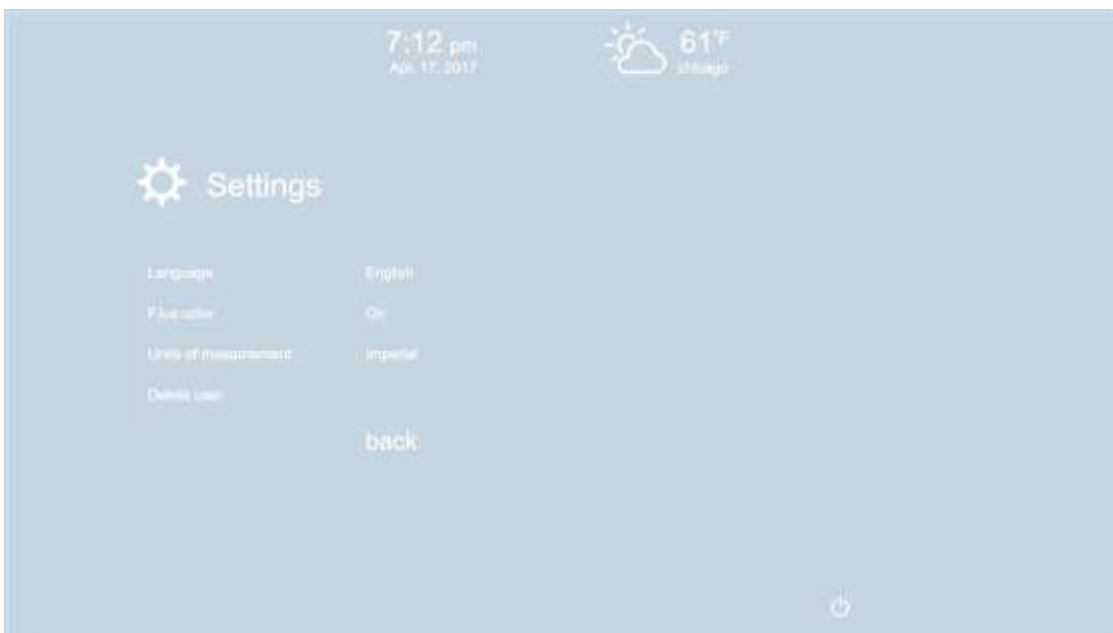

To close an, press the white highlighted app icon in the app menu. Once pressed, the app disappears.

Settings

To get to settings, press the gear located in the app menu.

Here, you will find settings to change the language, background color (easier on the eyes in a dark environment), units of measurements, and the option to delete the current user. Options that are missing, but would be part of the real

production version include the ability to change the time, date, location, and Wi-Fi.

Logout

To logout, press the very last icon in the app menu.

Press yes to confirm the logout.
